

ICON Consultants makes Fastest-Growing Women-Owned & Led Companies List

May 6, 2022

ICON Consultants, a Houston-based human capital solutions provider, founded by Pamela O'Rourke, was recognized as one of the 50 fastest-growing women-owned companies in 2022 by the Women Presidents Organization.

This year marks the 15th anniversary of WPO's 50 Fastest-Growing Women-Owned/Led Companies. Businesses that made the list must be privately owned, women-owned or led and meet the annual revenue requirements.

The companies that comprise the list represent a wide range of industries from STEM-related fields to consumer products. Last year, the 50 that made the 2021 list represented a combined \$4.1 billion in revenue and collectively employed 24,000 people.

ICON Consultants has continued to grow year-over-year through its dedication to innovation in the human capital solutions space and delivering best-in-class service to its clients. "Keys to my success have been tenacity, determination, and being customer-centric," states O'Rourke. They continue to be a leader in the staffing and recruiting industry by providing the latest direct sourcing AI technology powered by Opptly and developing proprietary independent contractor technology that ensures compliance and mitigates risk regarding contingent labor.

Honorees were celebrated at an awards luncheon on Thursday, May 5th, at the Fairmont the Queen Elizabeth Hotel in Montreal, Quebec.
